WORK EXPERIENCE

META, SEATTLE

07/2023 – Present

PROJECT COORDINATOR

- Spearheaded the launch of over 25 consumer-facing projects within Product Data Operations in the AI/ML domain, each encompassing 1,000 to 10,000 image or video data points within GenAI and EgoExo groups.
- Handled the allocation of 6,000 hours to external data labeling, guaranteeing meticulous annotations vital for software and product growth.
- Ensured seamless alignment by facilitating communication, scheduling, prioritization, and status updates among Test/QA, Release, Engineering, and Product teams.

RIVIAN AUTOMOTIVE, PALO ALTO

09/2020 – 06/2023

STAFF SOFTWARE COORDINATOR

- Managed the end-to-end lifecycle of 10 self-driving projects, overseeing the processing of 500,000 2D/3D data labels.
- Led the creation of guidelines and procedures that improved quality metrics from 50% to 95%.
- Directed the onboarding, training, and daily task assignments for an internal 5-person team responsible for QA processes.
- Enhanced project iteration through agile methodology, achieving a significant reduction in weekly working hours from 4 to just 1.
- Within a 4-week timeframe, orchestrated the development of a cohesive taxonomy across 10 projects, collaborating closely with senior managers and spearheading weekly syncs to streamline procedures.
- Point-of-contact for the Vehicle Operations team to gather up to 5,000 data segments weekly, aligning with driving objectives averaging 60 hours per week.
- Pilot cross-functional collaboration with the analytics team and UX designer to develop roadmaps and create dashboard mockups to display up to 100,000 aggregate points
- Conducted interviews with prospective candidates and selected top talent to minimize turnover costs by 80%.
